

Application of AI tools

IS-02-09

Large Language Models(LLM) are used for natural language processing tasks such as language generation.

E commerce

Artificial Intelligence (AI) has revolutionized the e-commerce industry by enhancing customers' shopping experiences and optimizing businesses' operations.

Amazon's algorithm uses suggestions to incentivize buyers.

Lifestyle AI

Siri, Alexa and Cortana

Chatbots and virtual assistants which use voice commands

Artificial Intelligence is used to match answers to users questions.

Computer Vision

Computer Vision

Computer vision involves using AI to interpret and process visual information from the world around us. It enables machines to recognize objects, people, and activities in images and videos, leading to security, healthcare, and autonomous vehicle applications.

Thanks!
